

AQUAECO

quality plumbing solutions

SPECIAL NEEDS & WASHROOM SOLUTIONS

Aquazone was established in England in 2008 to provide quality plumbing solutions to the international market.

Aqua-eco products are focussed on water efficiency, meeting many international standards. The Cistern Solutions offer varying wall depths and have been used in many large residential and institutional projects throughout the world

The Mechanisms have the prestigious WRAS Certification and are suitable for use with most close coupled WC's produced to European standards. Our water savers and taps have helped many of our clients achieve LEED, ESTIDAMA or local equivalent water sustainability standards.

We have recently added a comprehensive programme of complete disability bathroom and washroom solutions.

Our products comply with major UK and European norms.

AQE-T001-SI

Aquaeco
